COMPANY PROFILE

Hascevher started its operations in Kahramanmaraş in 1993 with 100% domestic capital. As of today, we are the largest stainless steel cookware manufacturer in Turkey. With exports to 113 countries across 5 continents, Hascevher holds a significant position in this field. We are also present in all 81 provinces of Turkey and in major chain stores.

With our automation systems, we have a daily production capacity of 50,000 stainless steel pots, and 50,000 ceramic and granite pots. Our product range includes over 5000 items such as stainless steel, ceramic, granite, and roller pots, pans, teapots, coffee pots, pasta pots, and special HORECA series for hotels, restaurants, and cafes.

Following the latest technology trends, we have increased our efforts in recent years. In 2019, we established our design center approved by the Ministry of Science, Industry and Technology. By increasing the variety of our design-focused innovative products and producing high value-added, user-oriented items, we will continue to be indispensable in kitchens in the new year.

DESIGN CENTER

Mission

The mission of Hasceveher Design Center is to cooperate with universities and other institutions and organizations, We design original products and use existing products by accessing all data fields needed for design. They are people who can develop their own region and country, conduct research by producing their own resources, and develop industrial and technological resources. By contributing to the development of its structure, it has achieved global competitiveness and national competitiveness in every field related to design. is to be the decisive center in strategies.

Opinion

The vision of Hasceveher Design Center is to constantly update its infrastructure in design research and guidance. To be a pioneer, exemplary and respected design center that plays an active role in design services.

DESIGN PROSESS

Market Research

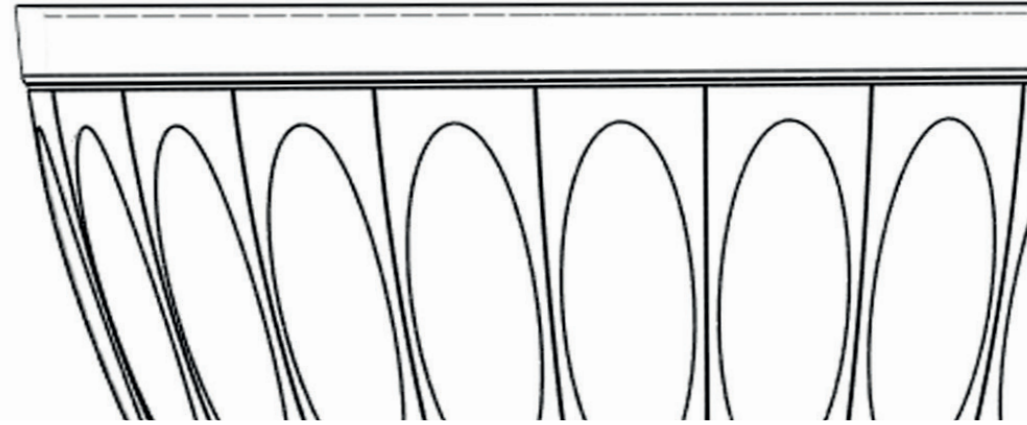

Before any product development, we will do a large of rigorous and careful market research in advance, from the perspective of the user experience to improve the details of each kitchen utensils and appliances, according to the feedback of continuous optimization, to design the most suitable for your life that occupy the home kitchen utensils and appliances.

Concept Sketches

Idea of the design effect is combined with the product process of heavy and complicated, it is the core of the product design. And concept sketches can help our tentative reach the out- line of a product prototype, sketch rendering details so that we further in-depth research and development.

Design Concept

After collecting the results of the market research, a optimization design concept which is suitable for your life is been formed initially.

3D Modeling

3D modeling can let our designer design sketches of rapid molding in the computer, in real life scenario, can simulate the perfect experience in real kitchen after birth.

3D Printing

3D printing technology to help us quickly get designed products, CNC forming technology is let our further details of the process to get perfect embodiment. To make our products eventually the model with worth a loo.

Final Confirmation

At the completion of the detection of a large number of heavy and complicated work, design work, after work, all datas, unified assessment, for the product appearance and performance are consistent affirmation, new attractive products will be officially released on the market.

OUR HISTORY

1996

The first company producing pressure cookers in Kahramanmaras.

Tredemark mark of Hascevher is officially registered in Turkey.

1999

The first company attending in an international fair in Kahramanmaras.

The first exporter firm in its sector in Kahramanmaras.

2004

Had CE certificate by TUV pressure cookers.

Reached a capacity of 24.000 pots per a day.

Take LAREX Certifiace for pots Romania.

Hascevher registered its tredemark in 27 countries according to Madrid Prodocol.

1993

Hascevher Company was established in Kahramanmaras.

1998

The first company having TSE certificate on it's sector in Kahramanmaras.

2001

Reacing 10.000 pots production capacity per a day.

2003

The first firm in Kahramanmaras Industrial Area.

2005

Had CE certificate from Istittuo Giardano in Italy for pressure cookers.

Starting integrating quality management and information systems into the workflow or our erterprise.

Management and Information Systems began work in 2005.

2007

Corporate Identity & Image facilities started.

2010

The new investment in automation began.

2011

30.000 pcs stainless steel cookware production per a day.

2014

Began production of Non-Stick.

2015

Reaching 10.000 Non-Stick production capacity per a day.

2019

Hascevher Design Center was established.

2021

Roller coating line was established.

2008

Innovation and R&D facilities started.

2009

Hascevher registered its trademark in 34 countries, according to Madrid Protocol.

2012

Have started to work for the ISO 9001 quality certificate.

2013

We export to 60 countries in 4 continents reached.

2016

Reaching 30.000 Non-Stick production capacity per a day.

2017

We export to 90 countries in 5 continents reached.

2024

Hascevher Holding was established.

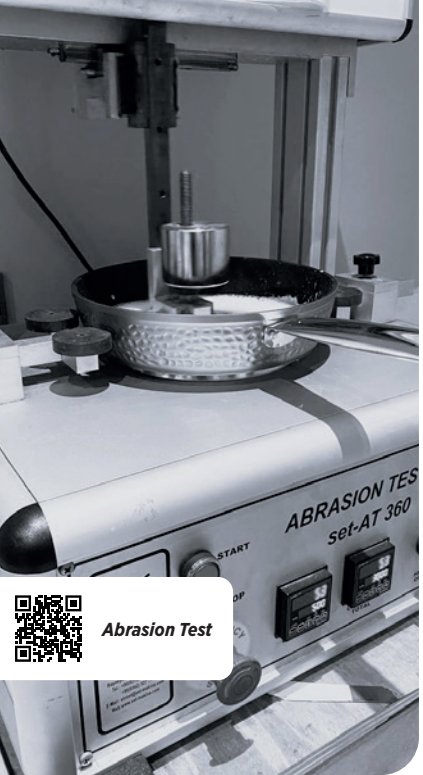

LABORATORY

As Hascevher Metal, we aim to bring the quality of every product we produce to the highest standards. For this reason, our products are rigorously tested by our expert team in a state-of-the-art laboratory environment.

Each product is subjected to a series of detailed tests for durability, safety and performance. Critical properties such as strength, temperature and pressure resistance, corrosion resistance of materials are carefully analyzed and approved in our laboratories. With these tests, we guarantee that our products comply with international quality standards and offer reliable and long-lasting solutions to our customers.

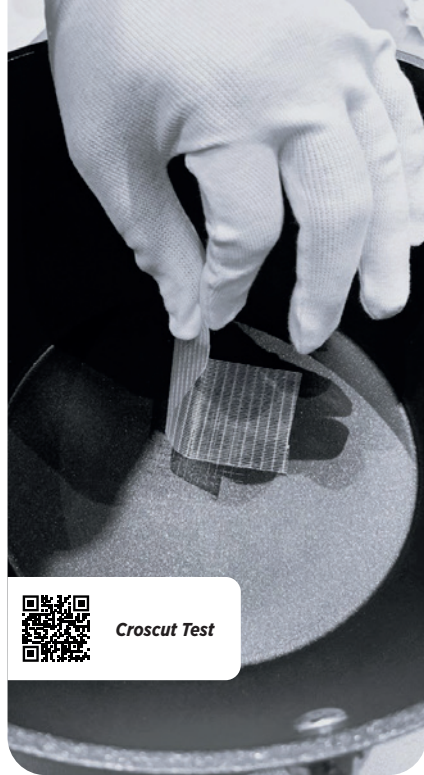

Thanks to this priority we give to quality, Hascevher Metal products are always reliable and high performance. We stand behind the assurance we offer you with our laboratory tests.

COATING TECHNOLOGY

GERMANITIUM

Germanitium is the special effect series of Hascevher. It stands out with its distinctive and impressive appearance compared to common non-stick coatings.

- It is applied as 2 coat system with specially developed spatters.
- Special spray guns are required to apply Coloria series..
- The best results are obtained on thick aluminum substrates.
- Coloria provides excellent abrasion resistance and non-stick performance.
- It is available in attractive dark shades.

SERMANITIUM

Ceramic series is developed for excessive non-stick performance. Ceramic is used for high quality cookware, where you need excellent nonstick properties.

- It is a special 2 coat system, which provides similar properties as 3 coat systems.
- 30 - 40 μ dry film thickness can be obtained with 2 coats.
- Provides a magnificent shiny surface.
- Specially modified colloid Chains are used in this series to provide the best release properties.
- Ceramic Primer contains specially reinforced materials that provide excellent adhesion and abrasion resistance.
- Excellent results in tiger paw and egg release tests.

ROLTIUM

The Roltium series is specially developed for roller lines designed for high-volume mass production. These coatings are applied to aluminum plates and designed to be suitable for shaping processes (post-forming).

- The Roltium series includes PTFE, silicone, and polyester-based options.
- They feature 3-layer systems providing excellent non-stick and wear resistance properties.
- The coating quality is comparable to 2-layer systems, but for higher quality expectations, spray systems are recommended.

STONECO

Stoneco series is developed to meet medium-high level non-stick coating requirements. It has a wide range of applications such as cookware, bakeware, small household appliances, etc.

- Middle-high level coating system with better abrasion resistance than Fusion series.
- Primer of Stoneco is strengthened with extra abrasive materials to extend the lifetime.
- Stoneco is available as 2 or 3 coat system.
- When applied as 3 coat system, it provides better performance in terms of release and abrasion.
- Various colors are available.

BASIC

Basic series is specially developed for the roller coating production lines. It is designed to be applied on aluminum plates first and then pressed to form the cookware (post-forming).

- 3 different versions are available; PTFE, silicone and polyester.
- 3 coat system which provides excellent release and abrasion properties.
- Different primer, midcoat and topcoat combinations are available according to requirements.
- It is available in metallic colors. It also provides a solution for patterned roller coating applications.

GRANITE EFFECT COATING

TRACES OF HISTORY IN YOUR KITCHEN

GERMANITIUM

THE ART OF THE PAST MEETS THE POWER OF GRANITE WITH GERMANITIUM!

Germanitium, named after the ancient mosaics of Germencia, brings the historic elegance and robustness of granite to your kitchen. This special granite-coated cooktop combines the art of the past with modern cooking technologies.

GERMANITIUM

For product promotion

Germanitium Granite Coating

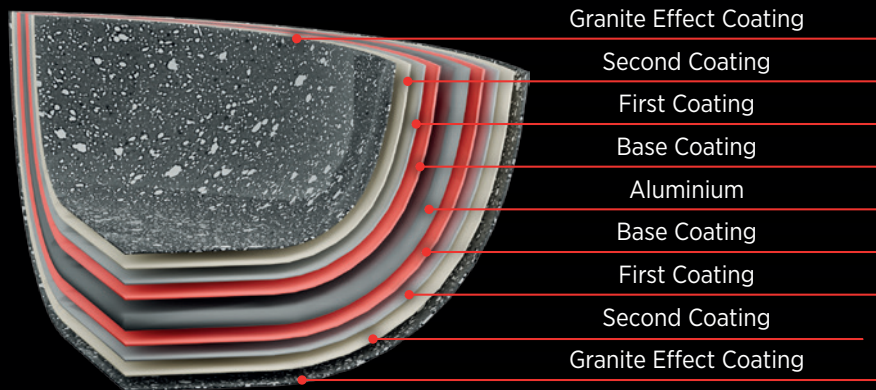

The surface of Germanitium pots is reinforced with a highly durable granite coating. Resistant to abrasion, scratches and impacts, this coating also retains its color and structure when in contact with high temperatures.

Ergonomic Heat Resistant Handles

Germanitium pot handles are made of high temperature resistant materials and provide a comfortable and safe use thanks to their ergonomic design. It offers comfort during cooking with its non-flammable and non-burning structure.

Durable Tempered Glass Cover

The glass lid is made of shatter-resistant tempered glass. Resistant to high temperatures, this lid keeps the heat in and allows you to watch your food.

BRING THE POWER OF STONE TO YOUR KITCHEN

STONECO

THE PERFECT COOKING EXPERIENCE INSPIRED BY NATURE

STONECO

Stoneco takes its name and spirit from the stones in nature; it brings the power of nature to your kitchen with its granite coating.

Equipped with advanced induction base technology, the Stoneco cooking group allows you to cook your meals at the ideal temperature while increasing energy efficiency.

The durability of granite and the technological advantages of the induction base provide the perfect cooking experience.

Stoneco's innovative **induction bottom** saves energy by distributing heat quickly and evenly.

3 in 1 Design

Combining a frying pan, shallow pot and pot, this innovative product is designed to meet your every cooking need in the kitchen. Save space with a multifunctional solution that offers three different uses in one product.

Durable and Sturdy Material

Made of high quality, non-stick aluminum, this set provides excellent heat conduction and durability for long-lasting use. It is lightweight for ease of use and resistant to high temperatures.

Space Saving

Easily cook all your meals without the need for multiple products. With its modular design, the All In One set allows you to free up more space in your kitchen and takes up less space in cabinets.

Non-Stick Coating

Thanks to its non-stick technology, it will never let your food stick to the pot. This makes cooking easier and cleaning effortless.

Easy Conversion

Thanks to its practical modular design, use it as a frying pan, shallow pot or pot depending on your cooking needs. Save time by quickly switching between products.

Heat Resistant Handles

Heat-resistant bakelite handles allow you to hold your pots easily even after you take them off the stove. Ergonomically designed for safe and comfortable use.

CRAFTSMANSHIP OF COPPER, POWER OF GRANITE

COPPER

THE ELEGANCE AND CRAFTSMANSHIP OF COPPER
COMBINED WITH THE STRENGTH OF GRANITE

The Copper series is inspired by the elegance of handcrafted copper.

Bringing the warmth and sophisticated aesthetics of traditional copper to your kitchen, this cooking group offers superior durability and performance with its modern granite coating.

Combining copper's historical craftsmanship with modern technology, Copper brings elegance and quality together in your kitchen.

Elegant Design and Superior Cooking Performance

With its eye-catching copper coating and durable structure, it offers an excellent choice both aesthetically and functionally.

Copper Effect Coating

The sleek and modern copper finish creates an eye-catching elegance in your kitchen. Copper's excellent thermal conductivity also maximizes cooking performance.

Durable Granite Interior

The non-stick granite interior ensures healthy cooking and prevents food from sticking to the pan. This feature helps you prepare delicious and light meals with less oil usage.

Glass Lid

The durable and transparent glass lid allows you to easily monitor the cooking process. It also provides a balanced cooking thanks to the steam outlet hole.

Ergonomic Metal Handles

Metal handles offer a secure and comfortable grip. With its heat-resistant structure, it can also be used safely in the oven, providing the advantage of versatile use.

Non-Stick Exterior

Massif cookware stands out with its scratch-resistant Non-Stick coating. Resistant to high temperatures, this coating offers both a healthy and safe cooking experience.

Energy Efficient Base

The special energy-efficient base evenly distributes heat for faster cooking and contributes to energy savings. It is compatible with all stove types and is especially ideal for induction cookers.

Golden Ergonomic Handles

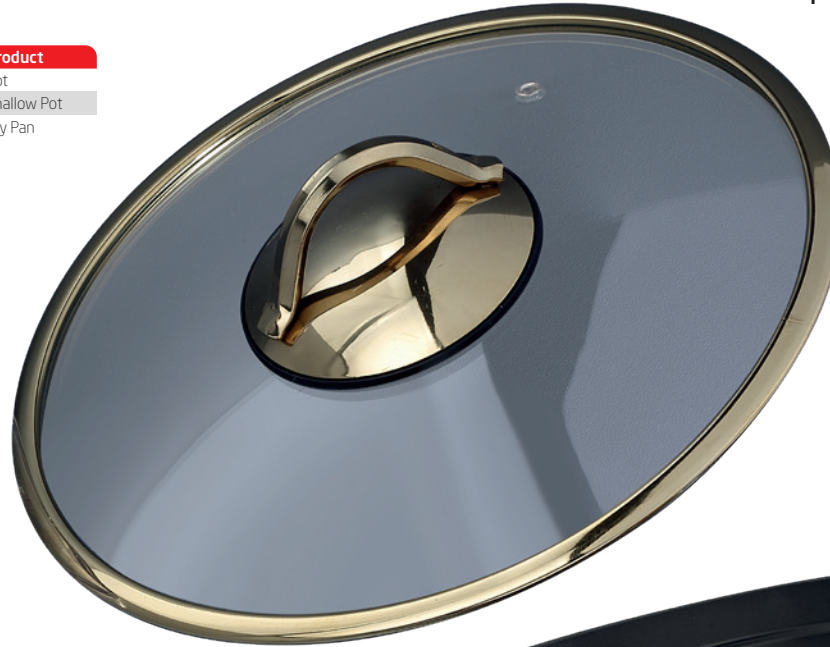

Ergonomic design provides a comfortable grip. Gold-colored metal handles offer a stylish look and are suitable for long-term use with their heat-resistant structure.

Glass Lid

Thanks to its transparent glass lid, you can watch your meals during cooking and prevent overflow with the steam outlet hole. It provides a more controlled cooking process by balancing the pressure.

Sophisticated Design and Superior Performance

While making cooking enjoyable with its stylish and aesthetic appearance, it provides long-lasting use with its superior material quality.

Safety Valve

The safety valve, which safely relieves excess pressure that may occur during pressure cooking, ensures complete safety during use. It keeps possible pressure spikes under control during cooking.

Easy On/Off System

The ergonomically designed Galaxy series offers a safe and comfortable use thanks to its easy on and off system. The lid mechanism of the product ensures complete safety during cooking and is user-friendly.

Cooking Vent

The cooking valve, which allows steam to escape in a controlled manner during cooking, ensures that food is cooked at the ideal pressure and temperature, and delicious results are achieved with balanced steam management.

Ergonomic Handles

Heat-resistant bakelite handles ensure that the Galaxy series offers users both safe and comfortable use. Its ergonomic structure provides safe transportation by preventing temperature transfer.

Stainless Steel Body

Manufactured using durable, high quality 18/10 stainless steel material. This material resists corrosion and rust while withstanding high temperatures, ensuring long-lasting use.

Laser Marking Technology is used on the bases of all our products. Laser marking offers an aesthetic appearance while leaving a long-lasting and indelible mark.

GASTRO

Pressure Cooker

Artical Code	Size	Liter
3DTYDK1524006	24 cm	15 lt
3DTYDK1724006	24 cm	17 lt

Laser Marking and Capacity Information

We track the production of pressure cookers using serial numbers. Additionally, we indicate the capacity and the maximum water level on the body of each pressure cooker.

Cooking Valve (0,55 bar)

Use for cooking. It constantly discharges surplus steam regularly to prevent the pressure from increasing.

Induction Capsule Bottom

Gastro series offers energy efficiency and excellent heat distribution with its induction capsule base. Induction capsule base is suitable for all types of gas, electric, ceramic etc. hobs.

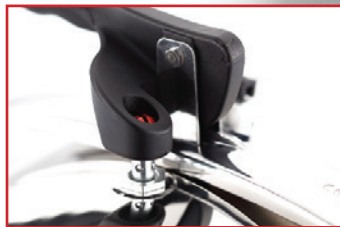

Safety Silicon (2 bar)

Safety silicon in protected position, for total safety who's cooking. If the valves are not working to release the pressure, safety silicon is going out to release the pressure in the pressure cooker.

Safety Lock Valve (1,10 bar)

Avoid accidental opening of the lids. When there is pressure in the pressure cooker, Safety lock valve is going up and locks the lid. In the same time, If cooking valve is not working, safety lock valve starts to work to release the pressure.

Classic Elegance and Superior Durability

With its timeless design and high quality structure, it makes both an aesthetic and functional contribution to your kitchens.

Stainless Steel Body

Arbel cookware is made of durable and stainless steel. It provides a professional look in the kitchen while offering long-lasting use.

Ergonomic Steel Handles

The ergonomic steel handles offer a secure and comfortable grip. It is suitable for long-term use with its flame resistant structure.

Glass Cover

Thanks to the durable glass lid, you can easily monitor the cooking process of your meals and control the pressure with the steam outlet hole. This feature prevents food from overflowing and ensures a more even cooking process.

Sleek and Modern Design

It adds elegance to your kitchen with its oval shape and the shine of stainless steel. An aesthetic and functional cookware set with perfectly rounded lines.

Integrated Steel Cover

The steel lids, which are compatible with the body, stand out with their durability and modern design. These perfectly fitting lids keep the heat and moisture in during cooking, making your meals more flavorful and cooked to perfection.

Durable Bakelite Handles

Specially designed ergonomic bakelite handles protect your hands from heat while carrying your pot. At the same time, it offers safe use with its anti-slip structure.

Durable Stainless Steel Body

The high quality stainless steel material prevents the pot from corroding and rusting while providing long-lasting use. This high-temperature resistant structure can be used safely on all types of stoves.

ORANGE

Add both durability and aesthetics to your kitchen with Orange Series!

A perfect cooking experience awaits you with its oval design, steel lids and ergonomic handles.

Elegance and Performance in Kitchens with Elegant and Durable Design

Professional touch in your kitchen with fast cooling steel handles and hidden base technology that provides superior heat distribution!

Fast Cooling Steel Handles

Thanks to the stainless steel handles and hollow structure, your pot cools down quickly after it is removed from the stove. So you can hold it safely and use it comfortably. Ergonomic design ensures long-term use without tiring your hand.

Hidden Base Technology

Venice Cookware Set cooks your meals faster and saves energy with its high heat conduction hidden base technology. By distributing the heat evenly, it guarantees that the food is cooked perfectly.

Stainless Steel Body

The transparent glass lid makes it easy to follow the cooking process, while the sturdy steel body ensures the pot is long-lasting. Quality stainless steel combines aesthetics and durability.

Performance Heat Dissipation

This cookware, which can be used on all stove types (induction, gas, electric), distributes the heat evenly and preserves the flavor of the food in the best way.

The Perfect Combination of Elegance and Ease of Use

With its stainless steel body and stylish appearance, it offers both a durable and elegant usage experience.

Stainless Steel Body

Beren cookware set is made of high quality stainless steel for long-lasting use. It adds a professional touch to your kitchen while cooking your meals safely.

Ergonomic Bakelite Handles

The ergonomic bakelite handles of the Beren pot provide a safe and comfortable use by transmitting heat at a minimum level. It protects your hands even at high temperatures and makes it possible to carry it easily.

Induction Compatible Base

Thanks to its specially designed base for induction cookers, Beren cookware saves energy by distributing heat quickly and evenly and helps your meals cook in less time.

Glass Cover

The transparent glass lid allows you to easily monitor the cooking process. The steam outlet hole in the lid balances the pressure inside the pot and minimizes the risk of overflow.
